

ENSEMBLE LEARNING

Machine Learning for Autonomous Robots

Melvin Laux

Researcher

AG Robotik, University of Bremen

7 décembre 2023 – Bremen, Deutschland

Outline

- ① Questions
- ② Recap
- ③ Jupyter Notebook

Questions

Questions

Any questions ?

Recap

Recap questions

- ▶ Explain the bias/variance trade-off

Recap questions

- ▶ Explain the bias/variance trade-off
- ▶ What are ensemble methods?

Recap questions

- ▶ Explain the bias/variance trade-off
- ▶ What are ensemble methods?
- ▶ What is a weak learner?

Recap questions

- ▶ Explain the bias/variance trade-off
- ▶ What are ensemble methods?
- ▶ What is a weak learner?
- ▶ Explain the difference between sequential and parallel ensembles.

Recap questions

- ▶ Explain the bias/variance trade-off
- ▶ What are ensemble methods?
- ▶ What is a weak learner?
- ▶ Explain the difference between sequential and parallel ensembles.
- ▶ What is bagging? What does it stand for?

Recap questions

- ▶ Explain the bias/variance trade-off
- ▶ What are ensemble methods?
- ▶ What is a weak learner?
- ▶ Explain the difference between sequential and parallel ensembles.
- ▶ What is bagging? What does it stand for?
- ▶ Explain the general concept of boosting.

Recap questions

- ▶ Explain the bias/variance trade-off
- ▶ What are ensemble methods?
- ▶ What is a weak learner?
- ▶ Explain the difference between sequential and parallel ensembles.
- ▶ What is bagging? What does it stand for?
- ▶ Explain the general concept of boosting.

Jupyter Notebook

Programming Task

Task : Download the jupyter notebook and solve all tasks.

Thank You !
